  - Keenly relevant to global health — nurses silently struggle — with severe shortages — to meet local needs
  - Critical global goals — 17 UN SDGs — continue to miss their targets

**NIGH INTEGRAL MODEL C**
- **Propose 4 Synthesis Solutions**
  - Establish participatory grassroots-to-global demonstrations of peoples’ power to increase informed concern
  - Identify health as:
    - our common ground
    - our moral imperative
    - a bridge across boundaries
    - a path to world peace
  - Amplify voices of nurses & citizens — across the global arena — for humanity’s deepest needs
  - Collaborate with global stakeholders to increase advocacy & achievement of 17 UN Sustainable Development Goals — SDGs
